## SY1000 Series clamp current meter

### SY1000 high precision clamp ammeter

Input: one voltage AC 0-500V 0.01V resolution 0.2 class accuracy  
one current AC 0-10A, 0.1mA resolution 0.5 class accuracy

Function: amplitude, phase, frequency, active power, active power factor  
Measured wire diameter: 7mm

### SY1000R Flexible coil ammeter

Input: one voltage AC 0-500V 0.01V resolution 0.2 class accuracy  
one current AC 0-3000A, 0.01A resolution 1.0 class accuracy  
Function: amplitude, phase, frequency, active power, active power factor  
Measured wire diameter: 200mm  
Ideal tool for low-voltage and high-current measurement in narrow space environments such as busbars.

### SY1000T Iron core grounding ammeter

Input: one voltage AC 0-500V 0.01V resolution 0.2 class accuracy  
one current AC 0-10A, 0.1mA resolution 0.5 class accuracy  
Function: amplitude, phase, frequency, active power, active power factor  
Measured conductor diameter: 50mm  
Tool for transformer core grounding current test, suitable for AC leakage current and current online test.

### SY1000H High voltage clamp ammeter

Range: 0-600A, resolution 0.001A.  
Voltage: 35KV or less (with 5 insulation rods)  
The meter connects to the mobile APP via Bluetooth, and the measurement results are displayed on the mobile phone in real time.
